

PLEASE do not change or deny the people of the State of New Jersey what I think is a very valuble service. I have been on this list since day one & even thou I do still get some calls- not half as much as I have gotten previously, but what I have noticed is that I am now getting calls from "Canada" I am not sure if they are included on the do not call list or have the access, but it might be an option for the future! Whenever a call does "get thru" I immediately inform them that I am on this list & will report them to the apporprate authorities, which I then make a note of the calling number- but many times it is private or unavailable, but this list has stopped a lot of the calls & I am sure there are always going to be a few whom will push the envelope & take the chance. But I work all day & sometimes I am not home to get, but again if a number shows on caller ID - I will call it back & advise them, I am tired of having a million calls on my answering machine when I get home at night only to find they are junk & of course you have to play to get to the real mesaages. We really need to stay focused on this issue & do not change - if only for the better. Thank you
